

Name: Maria Garcia

Email: maria.g.fs@email.com

Summary: Versatile Full Stack Developer with 5 years of experience building web applications using Python (Django/Flask) on the backend and React on the frontend. Comfortable working across the entire stack, from database design to UI implementation.

Skills: Python, Django, Flask, SQL (PostgreSQL), JavaScript, React.js, HTML, CSS, RESTful APIs, Git, Docker, AWS (EC2, S3, RDS), Heroku.

Experience:

Full Stack Developer, Bright Software Ltd. (2019-Present)

- Developed and maintained core features for a web platform using Django and React.
- Designed database schemas and wrote complex SQL queries.
- Built REST APIs to serve frontend applications.
- Implemented user interfaces using React and standard CSS.
- Deployed applications using Docker and Heroku/AWS.

Software Engineer, LogiSys (2017-2019)

- Worked primarily on backend systems using Python and Flask.

Education:

B.S. in Computer Engineering, Georgia Tech (2017)
